

2005 International Workshop on Web and Mobile Information Systems (WAMIS'05)

March 28, 2005, Taipei, Taiwan

http://dragon.acadiau.ca/~eshakshu/CIDS/AINA05_WAMIS05/index.htm

In conjunction with AINA 2005

19th IEEE International Conference on Advanced Information Networking and Applications

<http://www.takilab.k.dendai.ac.jp/conf/aina/2005>

Workshop Organizers

Dr. Elhadi Shakshuki
Acadia University, Canada

Dr. M. Younas
Coventry University, UK

Program Committee

- Andre Trudel, Acadia University, Canada
- Anne James, Coventry University, UK
- Athman Bouguettaya, Virginia Tech., USA
- Barry Eaglestone, University of Sheffield, UK
- Bharat Bhargava, Purdue University, USA
- Boualem Benatallah, University of New South Wales, Australia
- Christophe Claramunt, Naval Academy, France
- Daniel Silver, Acadia University, Canada
- Ee-Peng Lim, Nanyang Technological University, Singapore
- Hamada Ghenniwa, University of Western Ontario, Canada
- Hung-Hsu Tsai, National Huwei University of Science and Technology, Taiwan
- Irfan Awan, University of Bradford, UK
- Ivan Tomek, Acadia University, Canada
- Jianhua Ma, Hosei University, Japan
- Jim-Min Lin, Feng Chia University, Taiwan
- Jinli Cao, La Trobe University, Australia
- Judy C. R. Tseng, Chung Hua University, Taiwan
- Kuo-Ming Chao, Coventry University, UK
- Leonard Barolli, Fukuoka Institute of Technology, Japan
- Makoto Takizawa, Tokyo Denki University, Japan
- Maria Indrawan, Monash University, Australia
- Mounir Boukadoum, University of Quebec, CA
- Norman Revell, Middlesex University, UK
- Rachid Anane, Coventry University, UK
- S.M.F.D Syed Mustapha, University of Malaya, Malaysia
- Tomasz Müldner, Acadia University, Canada
- William Kwok-Wai Chung, Hong Kong Baptist University, Hong Kong
- Zakaria Maamar, Zayed University, UAE

The recent advances in Web and mobile technologies have dramatically changed the way information is accessed and managed thereby opening new scenarios for the consumption and exchange of information. These technologies offer exciting ways of accessing and manipulating distributed information. Consequently, new challenges and opportunities have been provided to the research community of the Web and mobile computing. This workshop aims to bring researchers from different fields in an effort to highlight the state-of-the-art and discuss the challenges and opportunities to explore the advances on recent development of Web and Mobile Information Systems (WAMIS). We invite submissions that address both theoretical and practical issues of WAMIS.

Suggested topics include, but not limited to:

- Innovative Web information systems
- Web and mobile applications
- Semantic web and Web services
- Pervasive information systems
- Human-Web agent interactions
- Middleware technologies for mobile-web applications
- Agent technologies, systems and architectures
- Web services and grid computing
- Mobile transaction and workflow processing
- Network-based mobile computing
- Discovery and composition of ubiquitous services
- Data Management in Mobile Computing
- Novel information searching techniques

Submission Instructions

Only full papers in English will be accepted. The length of the paper is limited to 6 single-spaced double column IEEE format pages. Papers may only be submitted electronically through the workshop website. All papers will be reviewed by independent reviewers. The WAMIS workshop accepted papers will be published by IEEE CS Press. Authors of high quality papers presented in the workshop will be invited to submit extended version of their papers for publication in a special issue of the International Journal of Information and Software Technology or in a special issue of the International Journal of Mobile Computing and Commerce.

Important Dates

Paper Submission	October 31, 2004
Acceptance Notification	November 15, 2004
Camera-ready Paper	January 1, 2005
